Total Workplace Entries	15566				

Source: Alumni Database. Caution: Note that most employment information is self-reported, and may represent the "most recent recorded" rather than the most recent employment. Classification of employment into broad and categories can be difficult and often depends upon subjective interpretation. Some record of employment is available for 68% of living alumni with a known address. Records tend to be more complete for older alumni, since many of the most recent graduates are highly mobile and may not have updated their information with the College.
