

Physics Comps: First Version Worksheet

- Do you feel your paper is integrative in nature?
 Yes No

If your answer was yes, please list some of the topics/courses you've feel you've drawn upon in your paper.

If your answer was no, then you and your advisor will need to have a serious talk about how to integrate different fields into the topic you've chosen.

-
- Comps is not meant to be a superficial treatment of an elementary subject. Do you feel you paper exhibits an appropriate depth from your Carleton career?
 Yes No

If your answer was no, then you need to think of ways to add more "depth" to your paper.

-
- Have you included a list of references and/or used appropriate citations in your text and for your figures?
 Yes No

If your answer was no, please include these before turning in your paper. Your paper **will not be accepted** without them. They are vital for your advisor not only to examine the types of sources you have been using but also to allow them to help you with any difficulties you might be having with the material. In general, you should limit the number of references for content from web sources.

-
- Have you spell checked and proofread a printed version of your paper?
 Yes No

If your answer was no, please do so before turning in your paper. Nothing is more frusraitng than reedng a ppaer filed wtih tpyos.

-
- Have answered all questions on this worksheet?
 Yes No

If your answer was no, then please be so kind as to completely fill it out! Your paper **will not** be read without it.

Please attach and turn this worksheet in with the first version of your COMPS paper.
