Joke o’ the Day
When is a doctor most annoyed?
Answer in Monday’s NNB
Man 1 can see Man 2 and Man 3. Man 2 can see Man 3. Man 3 can see none of the others. Man 4 can see none of the others.

The men are wearing hats. They are told that there are two white hats and two black hats. The men initially don’t know what color hat they are wearing. They are not allowed to turn around or move. They are not allowed to talk to each other. They are not allowed to take their hats off. They must shout out the color of the hat they are wearing as soon as they know for certain what color it is.

Who is the first person to shout?

Answer:
Man 2 will shout first.

Man 3 and Man 4 will not be able to tell which color hats they are wearing since they cannot see the other men. Man 1 can see Man 2 and Man 3 but is not able to tell what color hat he is wearing, as Man 2 and Man 3 are wearing different-colored hats. So Man 1 will not shout out.

Based on Man 1’s silence, Man 2 is able to interpret that he and Man 3 are wearing different-colored hats. Since Man 3 is wearing a black hat, Man 2 knows that he is wearing a white hat.
