WANT TO live in a cozy off-campus house over break? Wilde House (506 E. 3rd St) is looking for subletters. Email qiul

::Riddle Answer::

A farmer is trying to cross a river. He is taking with him a rabbit, carrots and a fox, and he has a small raft. He can only bring 1 item a time across the river because his raft can only fit either the rabbit, the carrots or the fox. How does he cross the river without something being eaten while he is not present. (You can assume the rabbit wants to eat the carrots and the fox wants to eat the rabbit. You can also assume that the animals will not eat if the man is present and that the fox and the rabbit are not trying to escape and run away)

Answer:

1) Take the rabbit to the other side
2) Go back and get the fox and switch it with the rabbit
3) Take the rabbit back across the river
4) Take the carrots across
5) Go back and get the rabbit
