CARLETON COLLEGE IS NOW BUYING CERTIFIED FAIR TRADE, ORGANIC BANANAS!

We have teamed up with St.Olaf and are using our purchasing power to redirect dollars towards farming practices that are good for the earth and for the farmers.

At conventional banana farms:

- Workers have become infertile due to exposure to pesticides, which are applied to plants 40-50 times a season
- Farmers work 10 to 12 hours a day, but get paid for only 8 hours
- Women workers receive lower wages than men, few benefits, and are subject to sexual harassment

Our new bananas are grown using organic practices that improve the land and workers are paid a living wage, treated with respect, and given the resources to empower and enrich their local communities.

Organic bananas will be available at Burton, the LDC, and Sayles!
