UPCOMING CONSTRUCTION ACTIVITIES: WEEK OF OCTOBER 16 & OCTOBER 23

Demolition of Mudd: The demolition contractor continues their work on the interior of the Mudd building. Interior selective demolition includes removing materials in a methodical manner to segregate and make recycling of materials possible contributing to our LEED Gold status and divert waste from landfills. Interior demolition will continue through this week and in to next week. Exterior demolition began this week, however interior demolition on 2nd and 3rd floors will need to finish before the exterior demolition fully ramps up. This demolition will start in the northeast corner of Mudd. This will be difficult to view from any areas open to faculty and students. Later next week, it will be easier to view the exterior demolition as progress moves south and to the west of Mudd. McGough will certainly alert everyone when the opportunity to view the mass demolition of Mudd becomes easier!

The campus, and surrounding neighborhoods can expect increased multi-axle truck traffic continuing next week as we continue to haul debris and material from Mudd along Olin Road. McGough, and our demolition partners, have temporary provisions set up to protect all from this increased traffic. That said, please practice “Heads up” while traveling around campus while walking and biking in this area. Everyone’s safety is priority #1 with McGough and all our contracted partners. If you have any ideas on how to improve any of these safety measures as you come upon them, please speak up!

Week of October 16th - Interior/Exterior demolition of Mudd to continue. At the mini bald spot south of LDC, east side walks to be cast in place with temp fencing to be removed shortly thereafter to reopen all walks from the south to LDC. Restoration of the mini bald spot to start with imported top soils and seeding restoration.

Week of October 23rd – Exterior demolition of Mudd will be in full-effect. It will be around this time that mass demolition will be visible to students and faculty. Please understand that this is a slow process and it will be done over many days – no need to worry about missing anything. We ask that for everyone’s safety, everyone observe the demolition from a safe distance and at a minimum stay outside of the construction fence at all times.
