The proposed Carleton College wind turbine site location is the West 1/2 Northeast 1/4, Section 32, Township 112 North, Range 19 West in Rice County, Minnesota. The property line is defined by the green dashed line below. Carleton College will use the land via a lease agreement with the landowner, Hazel Peterson. The wind turbine will connect directly to Carleton’s campus electrical grid via a buried transmission line running primarily along the Highway 19 public right-of-way as shown by the solid red line below. A gravel access road (shown in solid blue) will be constructed along an existing field road off of Highway 19.
