-Bicycle Locking Procedures-

**Proper**

- **GOOD**-
  Lock the frame of the bike to an immobile object with a Kryptonite U-lock.

- **BETTER**-
  Lock the frame and front wheel of the bike to an immobile object with a Kryptonite U-lock.

- **BEST**-
  Lock the front wheel, back wheel, and frame of the bike to an immobile object with a Kryptonite U-lock.

**Improper**

- **POOR**-
  Cable and chain locking devices are easily cut.

- **POORER**-
  Bicycles locked to themselves are easily picked up and carried away.

- **POOREST**-
  Bicycles left unlocked are simply ridden away.
