**Sam ’75 and Meg Woodside Endowed Fund for Career Exploration** supports students pursuing unpaid internships or other workplace experience with domestic government or non-profit organizations.

**PROFILES OF RECIPIENTS AND HOST ORGANIZATIONS**

**Guthrie Cunningham ’14, Religion**
*Hometown:* Finland, MN  
Guthrie worked with Wolf Ridge Environmental Learning Center to install and implement the infrastructure for cold-climate food production and preparing the small land parcel and greenhouses for a broad range of edible crops. Wolf Ridge is initiating the first major transition to a sustainable food system in northern Minnesota.

**Dennis Ea ’13, Biology**
*Hometown:* Maplewood, MN  
Dennis worked at the University of MN’s Masonic Cancer Center Tolar Lab, researching opportunities for “natural” gene therapy. He worked with Dr. Jakub Tolar to reprogram self-corrective skin cells into engineered stems cells with the ability to form many different cell types.

**Emily Lamberty ’14, Sociology/Anthropology**
*Hometown:* Lincoln, NE  
Emily worked as a policy research intern for State Senator McGill. Her primary project was rewriting the prostitution and sex-trafficking laws for the state of Nebraska. While not doing policy research on other human rights issues for future legislation, Emily learned about the process and function of the Nebraska unicameral.

**Claire McGillem ’13, Political Science/IR**
*Hometown:* Broomfield, CO  
Claire worked for the Center for Victims of Torture’ Partners in Trauma Healing, the international capacity building project. She tracked sub-grants for ten torture rehabilitation centers around the world, preparing information packets about in-country conditions for CVT staff soon to be posted abroad. She also did general research and worked with clinical psychologists to compile a treatment and healing handbook for the international centers.

**Megan Narvey ’13, Chemistry**
*Hometown:* Portage la Prair, Canada  
Megan worked for both the Manitoba Museum of Man and Nature, and the Milwaukee Art Museum. In both, she worked with a conservator on small conservation science research projects as well typical conservationist duties. While at the Milwaukee Art Museum, Megan’s focus was on art conservation, as opposed to archaeological conservation in Manitoba.

**Stephanie Kravitz ’13, Biology**
*Hometown:* Columbia, MO  
Stephanie investigated the association between single nucleotide polymorphisms and Bipolar Disorder or Schizophrenia diagnoses under the supervision of Dr. Jeremy Smoller at Mass General Hospital. She engaged in both laboratory and clinical aspects of research.
