Study Biology Abroad in the Caribbean this Summer

Two Opportunities to Study Biology on the island of Roatán

This Summer the University of Mississippi is offering two 2-week courses that offer all students (not just Biology majors) the opportunity to explore life on a tropical island.

- **Tropical Conservation Biology (4 credit hours)**
  When: May 14 - May 27
  Explore the disproportionately large amount of global biodiversity present in the tropics and the threats these unique ecosystems face.

- **Island Biogeography (4 credit hours)**
  When: May 28 - June 10
  Observe and learn about the remarkably unique biota that are subject to unique evolutionary forces and disproportionately high levels of extinction.

Field & Class - based courses

Students will learn about topics through daily ‘classroom’ discussion and field trips to various points of interest on the island.

Open to All!

U. Mississippi study abroad courses are open to students from all schools at no additional cost.

Costs: (same for all, no residency difference)
- 1 course: $3,995
- Both courses: $7,250

Included -
- Housing (beachfront villa on West End)
- Tuition, On-Island Trips, Lunch & Dinner

Not Included - Airfare, Breakfast, App. Fee
