TITLE:

App Engineer/Developer

SUMMARY:

We are searching for true technologists to join a constantly changing and innovative team. This team is dedicated to the development of new products and creative applications of existing technologies. These technology innovations continue to spearhead this firm into achieving global success and a reputation of producing true leaders for the next generation.

As a member of this team, you will be part of a growing network of technologists whose overriding objective is excellence, or more precisely, constant improvement. In an environment of radical openness, which values truth as a foundational principle in fostering creative thinking and originality, you will be encouraged to be both assertive and open-minded in order to discover your best path. This unique culture is what fuels success.

MINIMUM POSITION REQUIREMENTS:

- An undergraduate or masters degree in a technology-related discipline (such as Computer Science or Engineering) and/or impressive software development/engineering experience in an object oriented language (C#/Net, Java, Python, SQL)
- A strong academic record, learning agility, and conceptual ability
- Some understanding of programming principles, database systems, networking and system administration
- Is a quick, analytical thinker and excellent problem solver
- Can communicate clearly and excellently with a wide variety or people/functions and in a wide variety of formats (verbally, in writing, etc.)

If you are interested in hearing more about this opportunity or are interested in applying, please contact Alicia Steinmetz at asteinmetz@bondstreetgroup.com.
