Web development intern, Summer

Job Description
Delaget is seeking an aspiring web developer to join us in our St. Louis Park, MN office for a paid internship of 12-16 weeks during the Summer of 2017. At Delaget, you’ll work with a small team focused on building new tools for the restaurant industry. We expect that you’ll design and implement real improvements to our products and see those features get used by our customers at some of the nation’s biggest restaurant brands. At Delaget, you’ll work with all the components of a modern ASP.NET web development stack, including C#, ASP.NET MVC 5, SQL Server 2014, Javascript, jQuery, CSS, and SASS.

Location: St. Louis Park, MN
Job Type: Paid Internship
Education: Majoring in Computer Science, Software Engineering, Statistics, Data Science, Mathematics, or a related field
Supervisor: Head of Development
Department: Research & Development

About You
+ Interested in a career in Software Development
+ Pursuing an education in Computer Science, Software Engineering, Statistics, Data Science, Mathematics, or a related field
+ Passionate about building software that delights users
+ Ready to learn fast and get stuff done

About Us
+ We’re a small company with about 40 people in our St. Louis Park office.
+ We follow agile development practices and release code to customers every week
+ Our software is used in over 10,000 restaurants worldwide
+ We work a 40-hour week with flexible hours
+ Our first core value is making one another better

To Apply
In addition to (or instead of) a traditional resume, tell us about something that you’ve built, software or otherwise - How did you design it? What tools did you use? What problems did you need to solve? Describe your project in 250-500 words and include it in your email to ryan.ricard@delaget.com
