“The cruelest insult, on the contrary, which can be offered to the unfortunate, is to appear to make light of their calamities. To seem not to be affected with the joy of our companions is but want of politeness; but not to wear a serious countenance when they tell us their afflictions, is real and gross inhumanity.”

“If laws alone could make a nation happy, ours would be the happiest nation upon earth: idleness and vice could not exist; poverty would be unknown; we should be like prosperous hive of bees; all would have enough and none too much. The reverse of this we find to be the case: poverty and vice prevail, and the most vicious have access to the common stock.”

Joseph Townsend, A Dissertation on the Poor Laws, 1786.

Course Goals

How did we end up living as consumers in market society and thinking like citizens in state-governed political orders? What are the differences between farmers’ markets and conventional grocery stores such as Cub Food or Econono Food? Which one do you consider a phenomena of development and why? Why is community-supported agriculture different from industrial agriculture? What do conventional jargons such as “third world,” “first world,” “global south,” “global north,” “developed,” “developing,” and “under-developed” countries mean to you? What is neoliberal economic theory and why do global institutions such as the World Bank and International Monetary Fund embrace it? What do you think it means when you hear or say “free market”? Is poverty a product of culture? Do poor people care less about freedom? How
can poverty be eradicated? These are some of the questions that serve as a source of motivation for this seminar on Approaches to Development.

This seminar will raise questions that unravel enduring market-society relations and tensions to study cases and evidence that help us understand the notion of development in diverse societies. On the one hand, some scholars and practitioners declare that we live in a market civilization where market exchange of goods and services dictate human behaviors and activities. On the other hand, some argue that social interactions and human associations ingrained in enduring traditions, cultures, and histories dictate human activities including market exchanges. We live in a very exciting time, intellectually speaking, of the second wave of “The Great Transformation” since Karl Polanyi’s explanation of the political and economic origins of our time. Both State and Market are undergoing enormous transformation amplified by ongoing global economic stresses and global environmental changes including climate change. This contextual background serves as a conceptual landscape for the intellectual journey of this seminar to explore diverse approaches to development, properly understood.

The meaning of “development” has been contested across multiple disciplines and domains of societies. The disciplines of economics, political science, public policy, law, sociology, environmental studies, and anthropology all come to the forefront of studying how societies develop over time. In archeological terms, the development and continual existence of past civilizations has been at the core of the discourse among archeologists and historians who study factors leading to the rise and fall of civilizations. Can we reconcile the meaning of development in economic terms with the meaning of development in cultural, ecological, political, religious, social and spiritual terms? How can we measure quantitatively the holistic meaning of development? What and how do the UNDP Human Development Indexes and the World Development Reports measure to assess development of different countries? What are the exemplary cases from local to global scale that illustrate development? How do individual choices and patterns of livelihood activities link to communal, societal, and civilizational development trends? These overarching questions frame the learning mission of this seminar.

This seminar is designed to enable students to: (1) gain knowledge about theoretical underpinnings of political-economic theories that explain political economic orders; (2) understand the concepts and challenges of quantifying development; (3) undertake a research paper on a self-selected topic to apply theories, concepts, and methods learned from the course. To execute these goals, the seminar will be guided by the following outline.

**Course Outline**

Week 1: Ontological Foundations

Week 2: Epistemic Orientations

Week 3: Appraisal of Capitalism and State-centric World Orders

Week 4: Public Choice and Constitutional Choice

Week 5: Realities and Dynamics of Poverty

Week 6: Freedom and Development
Week 7: Knowledge and Development  
Week 8: Ecologicalization of Capitalism and States  
Week 9: Your Approach to Development  
Week 10: Mini-Conference  

**Required Texts:**

In addition to reading some chapters of these texts, there will be e-reserve readings available at the Gould Library and Course folder in Carleton network drive. I will also use visual materials such as movies and documentary videos that will serve illustration to the theories, concepts, and puzzles we struggle with in this course.

**Assignments, Expectations, and Grade**

There are five components of course assignments. These five components will be used to evaluate your performance in this course. The points for each assignment are in parentheses. The assignments are:

1. **Active Reading and Class Participation (20):** Your participation in this class begins with reading the assigned materials before the class for which readings are assigned. Raising questions, reflecting on lectures and your colleagues’ discussion in class are all counted as participation. This course will be conducted mostly in interactive seminar style. There will also be group-led and group-based discussion sessions. What this means is that you will
have many opportunities to participate. For group-led discussion sessions, you will sign up for two class periods.

(2) **Discussion Leaders (5):** There will be two students for each class leading the class discussion beginning on September 18. These two students are required to submit their questions and reflection on the readings to the class by 8:00 a.m. on the day we will discuss the readings. Please send it to posc361-00-f15@lists.carleton.edu. For group-based discussion sessions, I will assign specific problems related to the readings to each group during the class. After discussion within each group in class, groups will be responsible for reporting to the entire class and generating discussion.

(3) **Review of Documentary Videos (15):** Student will select one documentary video out of three: *Our Daily Bread*, *Friends at the Bank*, and *A Powerful Noise*. Each of these videos contains quantitative and qualitative arguments about the notion of societal development and change using language, images, cultures, and human diversity. These arguments are weaved into motion pictures and human expression in words, gestures, and actions to provide some sense of human progress or human decline as a theme of the documentary. The central task for students is to identify the main argument(s) of the documentary. Then identify key supporting qualitative and quantitative evidences in the documentary and analyze how the evidences compose a central theme of the documentary that shed light on our understanding of human progress. Your review will be evaluated by: (1) your identification of key quantitative arguments in motion pictures, human expression in words, gestures, and actions; (2) your identification of key qualitative arguments in motion pictures, human expression in words, gestures, and actions; (3) your analysis of how these key qualitative and quantitative arguments frame the central argument of the documentary as you identify it; (4) your organization of review essay; (5) control of language and errors; (6) critical and creative thinking and reflection; and (7) the use of the concepts from course readings and discussion as appropriate. The essay is due by no later than the day after it is shown. For the review purpose, these documentaries are on Reserve for the class at the library. You can watch it as soon as you want and write. Appendix A is grading rubric I will apply in evaluating your essay. The essay is due one day before the movie is to be discussed in class. In that sense, you will have to watch the movie before showing date. They are all reserved at the library.

(4) **A Research Paper (40):** Each student is required to write a research paper on a self-selected topic or a topic chosen from suggested list. This research paper can be an in-depth single case study paper or a theory-testing paper (testing a hypothesis quantitatively) applying theories and concepts we learned from the readings and discussion in class. While quantitative testing is optional in your theory building paper, quantitative critical thinking and reasoning must be incorporated into the paper. There are four graded processes in writing this research paper. Students will write (1) a three-page statement of topic proposal; (2) the outline of the paper; (3) the draft of paper; and (4) final paper. Your topic proposal is due on September 26. The outline and preliminary research exercise of the paper is due on October 9. The first draft of paper is due on October 23 (10 points so far). The final draft of the paper is due on November 12 (10 points). The final polished version of the paper is due on November 22 (15 points). 5 points of the grade for the paper is assigned to quantitative
reasoning component of the paper. I will provide more details about each process and expectation for each process in the assignment guideline to be distributed on September 16.

(5) A Mini-Conference Presentation and Peer Review (20): At the end of the term, beginning on November 16, we will hold Mini-Conference where each student will be assigned to present a colleague’s paper. The presentation should include both concise summary and the appraisal of the paper. Attendance during the Mini-Conference is mandatory. Each student will have 15 minutes to present the entire research paper of a colleague and thus this requires your skill to present in the most succinct and effective way. All presenters must submit PowerPoint slides or presentation notes to me by email before presentation in class. After presentation, reviewers will write a peer-review of the paper (2-3 pages) for the author. The breakdown of the grade is 15 points for presentation and 5 points for peer-review.

NOTE: All written assignments should be double-spaced pages with 12 point Times New Roman font and with page numbers. Send them to tmyint@carleton.edu in either pdf format or read-only rtf format.

Schedule of Assignments and Due Dates

9/14 - Pick a movie for review and sign up for due date
9/16 - Distribute guideline for research paper

11/18 - Mini-Conference Presentations continues (graded)
11/22 - Final term paper is due (graded)

Note: 2 to 3 page peer review of your colleague’s paper (see assignment #5) is due at 5:00p.m. on the next day after presentation at the Mini-Conference.

IMPORTANT: This is a provisional syllabus and subject to change depending on the ebb and flow of the course and surrounding world.

Course Conducts

a. Attendance: Attendance is required for this course. If you need to be absent from the class, it is your responsibility to notify me in advance. When you are absent, it is in your benefit to borrow notes from your classmate or ask your classmates to learn what you missed. If you wish, I will
be available during office hours or by appointment at your request to meet with you and go over what you missed while you were absent.

b. **Plagiarism:** There is zero tolerance for plagiarism. A summary of the College’s policy on plagiarism states: “At Carleton College, an act of academic dishonesty is therefore regarded as conflicting with the work and purpose of the entire College and not merely as a private matter between the student and an instructor; all cases involving such dishonesty are referred for appropriate action to the Academic Standing Committee (ASC) via the Associate Dean of Students or the Associate Dean of the College.” For more information on Carleton’s policy on academic honesty, please consult [http://apps.carleton.edu/campus/dos/handbook/academic_regs/?policy_id=21359](http://apps.carleton.edu/campus/dos/handbook/academic_regs/?policy_id=21359)

c. **Late assignments:** Assignments are due on the dates specified in this syllabus or in the assignment sheet. Late work **will receive half point reduction per late day.** If you are unable to complete an assignment on time due to illness or personal emergency, you can request an extension with the supporting documents such as a medical note from a doctor or the Wellness Center.

d. **Special needs:** If you require special accommodation due to a documented physical or medically classified different learning strategy, please come see me during the first week of class or any time throughout the semester to discuss how I might best assist you in meeting the objectives and requirements of this course.

**IMPORTANT:** The key for you to be successful as a student and for me as a teacher in this course is timely and effective communication between you and me. Carleton has numerous resources to help you excel in learning. If you do not know them, do not be shy to ask. Make good use of resources on campus! I encourage you to use the Write Place even if you consider yourself as the best writer in the world.
