Prairie and Wood  
Week 1  
June 18-22, 2007  

Fantastic Flying Friends

**Monday:** Welcome to Prairie and Wood 2007! Woot woot (note the bird noises). Today we will get to know each other while we make journals, fold paper cranes, play frisbee, do butterfly art, and learn about how caterpillars move and develop. We'll explore the wealth of wings in our wonderful arboretum!

**Tuesday:** Migration Day! We will make hummingbird-feeders, learn about goose culture, and discover how birds and other winged creatures migrate all around the world.

**Wednesday:** Myth and Music Day! Today we will think about how the music we make is inspired by the sounds we hear in nature. We'll learn about bird calls, write and sing songs about birds, and make our own instruments. We'll also explore myths and legends about flight and will get a chance to write our own stories.

**Thursday:** Bee Day! How often do you get to experience the life of a bee? Today we'll learn about how bees pollinate, fly, and produce honey. We'll bake honey goodies, make beeswax candles, look at a honeycomb, and possibly visit a bee farm. Feel free to dress up as a bee for the day.

**Friday:** Flying Friday! We'll dissect owl pellets, make bug catching nets, and learn about an assortment of flying creatures, including fireflies, bats, dragonflies, eagles, and pigeons. We might take a trip to River Bend Nature Center in Faribault.
