## Exhibitions on view:

### Seeing Symmetry

September-October, 2012  
Weitz Center for Creativity

Symmetry in the plane falls naturally into three categories of increasing complexity: rosettes, friezes, and wallpaper. This exhibition will feature each category in order, allowing visitors to build experience and see the simplest ideas before being confronted with the most complicated. Featuring the work of Frank Farris and his students.

## Featured blog:

She's not coming to our conference, but Maria Popova, "[an interestingness hunter-gatherer and curious mind at large](#)," is someone you should know. Her blog features fabulous book reviews, illustrations, and video links. An important part of visual learning is the process and investigation of mapping. Here's a post about cartography that I thought you might like:
